113- In your opinion what factors contribute to a good movie?

Nowadays, watching movie is one of the most popular h<u>obbies</u> for people in their pass time. Every month an estimated 80 or 90 movies are produced in around the world. Although different people <u>have</u> different taste in watching the genre of their own and everybody judges films with his own view, I generally believe that the movies must be privileged by some special factors such as professional actors and actresses, perfect drama, special effects, music   and <u>so far and so forth</u> for being considered as   good movie. Here on, I will try to make myself as clear as one can be on my proposed idea.

Without a doubt, the first aspect of an attractive movie is its actors or commonly *called: Stars`*. <mark>As an instance, when going for watching movie, I first ask myself who the actors playing in this movie are.</mark> Because they are the people who could change a movie to a box–office-hit movie whit their professional act. Definitely, A good movie should give the real feeling to its audiences at home or to the <u>movie-goers</u> and Obviously the expert actors give an outstanding performance in film.

Also, drama or the film script has a main role to create a perfect movie<mark>. In another word,</mark> an expert writer should write <u>a plot</u> in the way that movie seem attractive. In my opinion, the writer <mark>must possess a perfect sight</mark> about the subject and roughly have some real experience. Otherwise, He or she should have an academic education in this profession. It is very significant for a drama to be based on the writer knowledge about how to write it and develop it to make a fantastic movie.

To conclude, there are plenty of factors that come together to make a high quality movie. Audience must draw their attention to know and analyze these

factors to collect an excellent movie. To me, a good movie is a movie that you could recommend it to every one!
