

Films can tell us a lot about the country in which they were made. What have you learned about a country from watching its movies? Use specific examples and details to support your response.

Film, as an audio and visual motion picture, is absolutely one of the imperative means and to communicate with audience --- both inside the country in which it is made and outside it. There are a wide variety of films for any interests, namely: documentary, mystery, comedy , historical and thriller, by which people can entertain themselves. While majority of people watch TV to have indulging pastime, to me, things I learn from a film makes it valuable.

Perhaps the first and most significant effect of films on viewers is introducing the culture of its nation-men. People have the chance to get familiar with cultural events of each country by watching movie. For instance, in some films you can obtain information about important festivals in certain countries, the purpose of holding them, when they are celebrated and also who the participants in these occasions are . I personally claim that as everyone does not have this opportunity to visit all countries around the world by watching movies which are made based on these events, we can learn a lot about traditional costumes, food and dance and the like .

Secondly, several films show the civilization of some nationalities. These kinds of films are attractive for people who have a passion for a history. For example, numerous movies are made based on Egypt, China and Iran history. Most people know that these countries are cradle of civilization; however, they don't have adequate knowledge about former centuries and improvements which were in these countries. I reckon that these movies obviously strike a chord with audience to have further studies about past.

To sum up, I best postulate that movies not only are the fantastic ways for people to indulge in their pastime but also they can be powerful and invaluable methods to spread knowledge as well as information about all nationalities in the globe.

Comment : A good essay with a flowing organization. The underlined are masterly used. The essay could be best ` pictured ` by a nice stormy beginning.
