

The government has announced that it plans to **build a new university**. Some people think that your community would be a good place to locate the university. Do you agree with it?

Broad range of items should be studied for establishment of a university , and its location --- in particular --- is one of the most essential parts. **Although some professional people who have studied on the establishment of the new university in the region proposed to allocate it in my community, this may also cause a series of serious problems.** (Thesis)

**Introducing a university has definitely a healthy influence on any social context.** As the predominant figures of a university, students and their educational interactions can inject a new life to any area. I **well recall** when I was studying in the university, my department moved to a new place located in the absolute industrial area. After a few months, we experienced the changes in that area by observing the **spanning of** new restaurants, book stores, and new amenities coming to existence for the sake of students.

**However, my community does not have enough amenities to serve the requirements of a university.** Transportation network, for instance, is not sufficient for a university's communications. Considering a large number of people , including staff and students commuting every day from different part of the city to the universities, compensation of hidden public transportation seems so

complicated. Even by adding an extra transportation routes by pertinent authorities, the context of this community does not have adequate infrastructure to absorb the additional facilities. **At the end of the day**, lack of parking spaces and heavy traffics complexities would be the devoted praises to this community. In addition, our community has been designated, by default, as the residential area. With introducing a new mega-structure function as a university in this context, the privacy of the place will be certainly disturbed.

To sum up, I **well deem** locating the new university **in my vicinity** is not seemingly the best proposal, although it can **bring forth** some well-fare to the context. Regardless of the opportunities which **might be** created by the new university, the primary adjustment of the compound **will** not allow the critical function of university to work properly.
